

Add your code below following the instructions given in the course

Data Science Tools and ecosystem

In this notebook , Data science tools and ecosystem are summerized.

Some of the popular languages that Data scientist uses are :

1. Python
2. R
3. Julia

Some of the commonly used libraries used by data scientist include :

1. Pandas
2. Numpy
3. Seaborn

#### **Data Science Tools**

---

Jupyter Notebook

RStudio

Anaconda

Below are a few examples of evaluating arithmetic expressions in Python

This a simple arithmetic expression to mutiply then add integers

```
In [3]: (3*4)+5
```

```
Out[3]: 17
```

This will convert 200 minutes to hours by diving by 60

```
In [5]: (200 / 60)
```

```
Out[5]: 3.3333333333333335
```

Objectives that the notebook covers are :

**OBJECTIVES:**

**List of all the popular libraries .**

**List of all the popular languages .**

**List of all the popular open source code .**

**Author**

**Himanshu Siloliya**

```
In [ ]:
```
